Availability

Full UK and EU work rights; no
sponsorship required | Remote
preferred

Notice period: one month

Core Competencies

TypeScript, React, Next.js, Node.js,
Express

Python, FastAPI, PostgreSQL, Prisma,
SQL

LLM APIs, retrieval, structured
outputs, provider routing

n8n, webhooks, workflow automation

Docker, Git, GitHub Actions

Operational discovery, stakeholder
communication and delivery.

Education

MSc Politics & Religion, Babeş-
Bolyai University, 2011; BSc
International Relations & European
Studies, 2008.

Languages

Romanian: native | English: fluent |
Spanish / Italian: intermediate |
French: beginner

Professional Summary

Applied AI engineer with over ten years of operations leadership and experience in EU-funded delivery. Builds TypeScript / Next.js applications, Python / FastAPI services and n8n workflows for funding, municipal administration and hospitality. Combines practical domain knowledge with deterministic rules, API integration, testing and clear documentation.

Experience

Founder & Applied AI Engineer — Independent portfolio projects | *2025–present*

- Own problem definition, implementation, testing and documentation for funding, municipal and AI workflow applications.

Founder — Mitch from Transylvania | *2024–present*

- Developed hospitality software prototypes informed by operational work in the business.

Restaurant Manager — 108 Brasserie, Marylebone Hotel, London | *Jun 2024–May 2025*

- Led a 35+ front-of-house team across service standards, scheduling and day-to-day operations.

Hospitality Manager — London Business School | *Jul 2023–Jun 2024*

- Managed a 50-person team and coordinated service delivery for 1,000–2,000 guests per day.

General Manager — The Crown, Mosaic Pub & Dining | *Feb–Jun 2023*

Assistant General Manager — Head of the River, Fuller's | *Mar 2018–Jan 2023*

General Manager — Taina Lemnului, Romania | *Jul 2011–Dec 2017*

- Managed EU-funded project delivery, documentation and audit requirements.

Selected Projects

EuFund — public engineering exhibit

Source: <https://github.com/Bogdan0708/eufund-exhibit>

- Translated funding discovery, eligibility and document review into a staged workflow with cited retrieval and bounded tool access.
- Public exhibit demonstrates orchestration and provider-routing patterns. Main source remains private; no live funding service is claimed.

MitchAI — hospitality operations prototype

- Built a TypeScript / Node.js hospitality platform with multi-provider AI routing and eight n8n workflows for operations, menus, content and feedback.
- Executed ten synthetic n8n scenarios, including provider failure and parallel-branch merging. Model endpoints and database persistence were substituted; currently offline.

Primăria — municipal workflow platform

Source: <https://github.com/Bogdan0708/Primaria>

- Built a Next.js / TypeScript application with PostgreSQL, Prisma, tenant isolation and deterministic tax-domain modules.
- Implemented row-level security across 34 tenant tables; 327 tests in the 13 September verification, including real PostgreSQL checks. Portfolio stage; not publicly deployed.
