Professional summary

Applied AI engineer and founder-operator building evidence-led portfolio systems for funding, municipal administration and hospitality workflows. Current work combines TypeScript/Node.js, Next.js, PostgreSQL, deterministic workflow design, retrieval, structured outputs and LLM integrations. Brings 10+ years of operations leadership, P&L ownership, teams of up to 50+, and delivery of €500K+ in EU-funded projects.

Primary proof assets

- Grant Scout — public proof asset: Next.js/TypeScript agentic retrieval application with a 30-record snapshot dated 2026-08-29 (29 August 2026), deterministic eligibility and source citations, 11 unit tests and CI. The historical 97.5% evaluation is labelled historical and was not freshly reproduced in the latest inspected CI run. Deployment is pending. <https://github.com/Bogdan0708/grant-scout>
- EuFund — private-source portfolio project in active development. Funding discovery, eligibility, drafting and review are organised as a human-controlled workflow. No public deployment; the source is not presented as open source.
- PrimärIA — public portfolio/pilot-stage municipal platform implemented primarily with Next.js, TypeScript, PostgreSQL and Prisma. Checked-in code includes deterministic tax-domain modules, role/tenant controls and citizen/admin surfaces. No public deployment; legal and ANAF-related features are implementation work, not independent compliance assurance. <https://github.com/Bogdan0708/PrimaIA>
- MitchAI — hospitality software prototype whose primary implementation is Node.js, TypeScript and Express, with a Next.js frontend and PostgreSQL. n8n and Ollama are optional/configured integration infrastructure, not the primary runtime. No public production service is claimed. <https://github.com/Bogdan0708/MitchAI>

Technical focus

TypeScript, Node.js, Express, Next.js, PostgreSQL, Prisma, Python, FastAPI, Redis, vector retrieval, Docker, n8n, structured outputs, evals and GitHub Actions. Stack descriptions are project-specific; Python/FastAPI are not presented as MitchAI's primary runtime.

Experience & background

Operational depth applied to software delivery

Operations leadership

- Restaurant Manager, 108 Brasserie, Marylebone Hotel (Jun 2024–May 2025): led 35+ front-of-house staff and operational standards work.
- Hospitality Manager, London Business School (Jul 2023–Jun 2024): managed a 50-person team serving 1,000–2,000 guests per day; improved event operational efficiency by 25%.
- Assistant General Manager, Head of the River, Fuller's (Mar 2018–Jan 2023): increased online sales by 98% from 2020–2022, reduced labour cost by 30%, and led app adoption.
- General Manager, Taina Lemnului (Jul 2011–Dec 2017): managed €500K+ in EU funding across the application-to-audit lifecycle and heritage work involving 20+ sites.

Current portfolio work

Founder & Applied AI Engineer, EuFund and Primăria (2025–present); Founder, Mitch from Transylvania / MitchAI (2024–present). These are portfolio and active-development projects, not claims of publicly hosted production services.

Education

- MSc Politics & Religion in the Globalisation Era, Babes-Bolyai University (2009–2011).
- BSc International Relations & European Studies, Babes-Bolyai University (2005–2008).

Qualifications & languages

WSET Level 2; Level 3 Food Hygiene & Health & Safety; Fire Safety Management; Personal Licence Holder; Cellar Management; Full UK Driving Licence.

Romanian (native), English (fluent), Spanish and Italian (intermediate), French (beginner).
